

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

- 1-5. (Canceled)
6. (New) A lighting device, comprising:
 - an organic electroluminescent device;
 - a substrate on which the organic electroluminescent device is formed, and having a first principal plane opposite to a side where the organic electroluminescent device is formed; and
 - a light-guide element disposed adjacent to an edge of the substrate, being thicker than the substrate and having a reflector member for guiding light that is emitted from the organic electroluminescent device through the first principal plane of the substrate toward an inside of the light guide element, and the reflector member overhangs a part of the substrate.
7. (New) The lighting device according to claim 6, the organic electroluminescent including a pixel region to display and an illuminator region to illuminate the light-guide element.
8. (New) An electronic device comprising:
 - the lighting device according to claim 6; and
 - a display unit disposed above the substrate and illuminated by a light emitted from the first principal plane.
9. (New) The electronic device according to claim 8, the light-guide element further comprising a key input unit.
